

BILLING CODE 8011-01P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-94850; File No. SR-MSRB-2022-02]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing of a Proposed Rule Change Consisting of Amendments to MSRB Rule G-19 Regarding Regulation Best Interest for Certain Municipal Securities Activities of Bank Dealers and MSRB Rule G-48 Regarding Quantitative Suitability for Institutional Sophisticated Municipal Market Professionals

May 4, 2022

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act” or “Exchange Act”)¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 29, 2022, the Municipal Securities Rulemaking Board (“MSRB” or “Board”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

The MSRB filed with the Commission a proposed rule change consisting of amendments to: (i) MSRB Rule G-19, on suitability of recommendations and transactions, and (ii) MSRB Rule G-48, on transactions with sophisticated municipal market professionals (“SMMPs”)³ (collectively, the “proposed rule change”). The proposed rule change would align MSRB Rule G-19 to the Commission’s Rule 15l-1 under the Exchange Act (“Regulation Best Interest”)⁴ for certain municipal securities activities of bank dealers⁵ (the “Best Interest Amendments”). In addition, the proposed rule change would amend MSRB Rule G-48 to modify the quantitative suitability obligation of brokers, dealers, and municipal securities dealers (collectively, “dealers” and, individually, each a “dealer”) by eliminating the quantitative suitability obligation for recommendations in circumstances where a dealer does not have actual control or de

³ Under MSRB Rule D-15, on the term sophisticated municipal market professional, “[t]he term ‘sophisticated municipal market professional’ or ‘SMMP’ is generally defined by three essential requirements: the nature of the customer; a determination of sophistication by the broker, dealer or municipal securities dealer []; and an affirmation by the customer; as specified [therein].” See MSRB Rule D-15. See also related discussion under Background and Purpose of the Institutional SMMP Amendment - Background on MSRB Rule D-15 and SMMP Affirmation Requirements near note 37 infra.

⁴ 17 CFR § 240.15l-1; see also Exchange Act Release No. 86031 (June 5, 2019), 84 FR 33318 (July 12, 2019) (File No. S7-07-18) (“Regulation Best Interest Adopting Release”).

⁵ Consistent with MSRB Rule D-8, on the term bank dealer, the term “bank dealer” as used herein means “a municipal securities dealer which is a bank or a separately identifiable department or division of a bank as defined in rule G-1 of the Board.” Such references in this proposed rule shall be collectively to “Bank Dealers” or individually to a “Bank Dealer.” See also MSRB Rule D-11, on the term associated persons (indicating that the term bank dealer as used in MSRB rules shall generally refer to the associated persons of a bank dealer unless the context otherwise requires or a rule of the Board otherwise specifically provides).

facto control over the account of an Institutional SMMP (the “Institutional SMMP Amendment”).⁶

Subject to Commission approval, the respective compliance dates for the amendments to MSRB rules included in the proposed rule change will be announced in a regulatory notice published by the MSRB on its website within 30 days of the publication of the Commission’s approval order in the Federal Register. Such compliance date for the Best Interest Amendments will be no earlier than one year from the MSRB’s publication of the regulatory notice announcing it.⁷ Such compliance date for the Institutional SMMP Amendment will be no earlier than 30 days from the MSRB’s publication of the regulatory notice announcing it.

The text of the proposed rule change is available on the MSRB’s website at www.msrb.org/Rules-and-Interpretations/SEC-Filings/2022-Filings.aspx, at the MSRB’s principal office, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the

⁶ The term “Institutional SMMP” is used here as defined below under the discussion Background and Purpose of the Institutional SMMP Amendment. The Institutional SMMP definition used herein would not encompass any natural person customers who qualify as “retail customers” under the definitions of Regulation Best Interest, such as certain natural persons with significant total assets, who might otherwise meet the status requirements of an SMMP. See note 20 infra and related discussion under Background and Purpose of the Institutional SMMP Amendment.

⁷ This one-year minimum timeframe is roughly equivalent to the timeframe provided by the Commission when it adopted Regulation Best Interest. See Regulation Best Interest Adopting Release, 84 FR at 33318, 33400 (setting an effective date of September 10, 2019 and a compliance date of June 30, 2020).

purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change consists of the Best Interest Amendments to MSRB Rule G-19 and the proposed Institutional SMMP Amendment to MSRB Rule G-48 for the respective purposes further described below.

Background and Purpose of the Best Interest Amendments

The proposed Best Interest Amendments would amend MSRB Rule G-19 to extend the obligations of Regulation Best Interest to Bank Dealers when making recommendations to retail customers of municipal securities transactions or investment strategies involving municipal securities (collectively, “retail municipal recommendations” and, individually, each a “retail municipal recommendation”). The Best Interest Amendments are intended to improve investor protection in the municipal securities market by ensuring that retail customers are afforded investor protections under Regulation Best Interest, regardless of whether a retail municipal recommendation received by a retail customer is made by a Broker-Dealer or a Bank Dealer.⁸

Background on the Commission’s Regulation Best Interest

⁸ The term “Broker-Dealer” is used here as defined below under the following discussion Background on the Commission’s Regulation Best Interest.

On June 5, 2019, the SEC adopted Regulation Best Interest, which established a new standard of conduct for broker-dealers, and the natural persons who are associated persons of such broker-dealers (collectively, “Broker-Dealers” and, individually, each a “Broker-Dealer”), when making a recommendation to a retail customer of any securities transaction or investment strategy involving securities.⁹ As defined in Regulation Best Interest, the term “retail customer” generally refers to any natural person, or the legal representative of such person, who receives and uses a recommendation from a Broker-Dealer primarily for personal, family, or household purposes.¹⁰ Regulation Best Interest enhanced the Broker-Dealer standard of conduct beyond existing suitability obligations, such as those required by MSRB Rule G-19, on suitability, for such retail customers and aligned the applicable standard of conduct with the reasonable expectations of retail

⁹ See, generally, Regulation Best Interest Adopting Release (citation at note 4 *supra*). In response, on May 1, 2020, the MSRB filed a proposed rule change with the Commission to harmonize Regulation Best Interest with certain MSRB rules applicable to related municipal securities activities of Broker-Dealers. See Exchange Act Release No. 88828 (May 6, 2020), 85 FR 28082, File No. SR-MSRB-2020-02 (hereinafter, the “Broker-Dealer Harmonization Filing”), available at <https://msrb.org/-/media/Files/SEC-Filings/2020/MSRB-2020-02-Notice.ashx?>. The Commission approved these proposed amendments on June 25, 2020. See Exchange Act Release No. 89154 (June 25, 2020), 85 FR 39613 (July 1, 2020), File No. SR-MSRB-2020-02, available at <https://msrb.org/-/media/Files/SEC-Filings/2020/MSRB-2020-02-Federal-Register.ashx?>.

¹⁰ 17 CFR § 240.151-1(b)(1) (“Retail customer means a natural person, or the legal representative of such natural person, who (i) [r]eceives a recommendation of any securities transaction or investment strategy involving securities from a broker, dealer, or a natural person who is an associated person of a broker or dealer; and (ii) [u]ses the recommendation primarily for personal, family, or household purposes.”) For discussion of what it means for a retail customer to “use” a recommendation, see the SEC staff’s Frequently Asked Questions on Regulation Best Interest, available at <https://www.sec.gov/tm/faq-regulation-best-interest>.

customers.¹¹ In this regard, Regulation Best Interest imposes the following “general obligation” on Broker-Dealers, stating a broker, dealer, or a natural person who is an associated person of a broker or dealer, when making a recommendation of any securities transaction or investment strategy involving securities (including account recommendations) to a retail customer, shall act in the best interest of the retail customer at the time the recommendation is made, without placing the financial or other interest of the broker, dealer, or natural person who is an associated person of a broker or dealer making the recommendation ahead of the interest of the retail customer.¹²

Discussion of Regulation Best Interest’s Current Applicability to Bank Dealers

By its terms, Regulation Best Interest does not apply to retail municipal recommendations made by Bank Dealers, because Bank Dealers in exempted securities have an exception from Broker-Dealer status under the Act and Regulation Best Interest applies only to Broker-Dealers. As a result, Bank Dealers presently are not required to comply with Regulation Best Interest and, therefore, retail investors may not benefit

¹¹ Regulation Best Interest Adopting Release, 84 FR at 33319.

¹² 17 CFR § 240.15l-1(a)(1). Regulation Best Interest provides that this general obligation is satisfied only if a Broker-Dealer complies with four component obligations: (i) an obligation to make certain prescribed disclosures, before or at the time of the recommendation, about the recommendation and the relationship between the retail customer and the Broker-Dealer (the “Disclosure Obligation”) (see 17 CFR § 240.15l-1(a)(2)(i)); (ii) an obligation to exercise reasonable diligence, care, and skill in making a recommendation (the “Care Obligation”) (see 17 CFR § 240.15l-1(a)(2)(ii)); (iii) an obligation to establish, maintain, and enforce written policies and procedures reasonably designed to address conflicts of interest (the “Conflict-of-Interest Obligation”) (see 17 CFR § 240.15l-1(a)(2)(iii)); and (iv) an obligation to establish, maintain, and enforce written policies and procedures reasonably designed to achieve compliance with Regulation Best Interest (the “Compliance Obligation”) (see 17 CFR § 240.15l-1(a)(2)(iv)).

from its enhanced standard of conduct when receiving recommendations from Bank Dealers.¹³

Application of Regulation Best Interest to Bank Dealers

The proposed Best Interest Amendments would amend MSRB Rule G-19 to require a Bank Dealer to comply with Regulation Best Interest to the same extent as if it were a Broker-Dealer when making a retail municipal recommendation. Consequently, a Bank Dealer would have to act in the best interest of the retail customer at the time a retail municipal recommendation is made, without placing the financial or other interests of the Bank Dealer ahead of the interest of the retail customer. Correspondingly, the Bank Dealer would have to comply with the Commission's component obligations of Regulation Best Interest to the same extent as if it were a Broker-Dealer, including Regulation Best Interest's Disclosure Obligation,¹⁴ Care Obligation,¹⁵ Conflict-of-Interest Obligation,¹⁶ and Compliance Obligation.¹⁷ Under the proposed Best Interest Amendments, the component obligations of Regulation Best Interest would apply to

¹³ See Broker-Dealer Harmonization Filing, 85 FR at 28083, n. 5 (discussing how Bank Dealers are not subject to Regulation Best Interest by the terms of the SEC's rules and indicating the Board's intent to issue a request for comment regarding extending the requirements of Regulation Best Interest to Bank Dealers). Notably, all Bank Dealer recommendations, including retail municipal recommendations, are presently subject to the longstanding suitability obligations provided by MSRB rules, including MSRB Rule G-19 and, when applicable, MSRB Rule G-48.

¹⁴ 17 CFR § 240.151-1(a)(2)(i).

¹⁵ 17 CFR § 240.151-1(a)(2)(ii).

¹⁶ 17 CFR § 240.151-1(a)(2)(iii).

¹⁷ 17 CFR § 240.151-1(a)(2)(iv).

those municipal securities activities associated with a retail municipal recommendation within the overall context of a Bank Dealer business model. The MSRB believes that any SEC guidance with respect to the understanding and application of Regulation Best Interest would be equally applicable to Bank Dealers.

Application of the Disclosure Obligation to Bank Dealers

Consistent with Regulation Best Interest's Disclosure Obligation, the proposed Best Interest Amendments would require a Bank Dealer, prior to or at the time of the retail municipal recommendation, to provide to its retail customer, in writing, full and fair disclosure of: (a) All material facts relating to the scope and terms of the relationship with the retail customer, including: (i) That the Bank Dealer is acting as a municipal securities dealer with respect to the retail municipal recommendation; (ii) The material fees and costs that apply to the retail customer's transactions, holdings, and accounts; and (iii) The type and scope of services provided to the retail customer, including any material limitations on the securities or investment strategies involving securities that may be recommended to the retail customer;¹⁸ and (b) All material facts relating to conflicts of interest that are associated with the retail municipal recommendation.

Application of the Care Obligation to Bank Dealers

¹⁸ For example, if the applicable legal charter of a Bank Dealer only permits a Bank Dealer to conduct municipal securities activities or, in fact, a Bank Dealer's business model is limited to municipal securities activities, then the Bank Dealer generally would be required to accurately disclose the fact that it only engages in transactions involving municipal securities and, therefore, will only make recommendations to a retail customer regarding transactions involving municipal securities. See also note 19 infra (discussing the Compliance Obligation pursuant to the Best Interest Amendments for Bank Dealers who do not engage in any retail municipal recommendations).

Consistent with Regulation Best Interest's Care Obligation, the proposed Best Interest Amendments would require a Bank Dealer to exercise reasonable diligence, care, and skill to: (a) Understand the potential risks, rewards, and costs associated with any retail municipal recommendation, and have a reasonable basis to believe that a retail municipal recommendation could be in the best interest of at least some retail customers; (b) Have a reasonable basis to believe that the retail municipal recommendation is in the best interest of a particular retail customer, based on that retail customer's investment profile and the potential risks, rewards, and costs associated with the recommendation, and does not place the financial or other interest of the Bank Dealer ahead of the interest of the retail customer; (c) Have a reasonable basis to believe that a series of retail municipal recommendations, even if in the retail customer's best interest when viewed in isolation, is not excessive and is in the retail customer's best interest when taken together in light of the retail customer's investment profile and does not place the financial or other interest of the Bank Dealer ahead of the interest of the retail customer.

Application of the Conflict-of-Interest Obligation to Bank Dealers

Consistent with Regulation Best Interest's Conflict-of-Interest Obligation, the proposed Best Interest Amendments would require a Bank Dealer to establish, maintain, and enforce written policies and procedures reasonably designed to: (a) Identify and at a minimum disclose, in accordance with its Disclosure Obligation, or eliminate, all conflicts of interest associated with such retail municipal recommendations; (b) Identify and mitigate any conflicts of interest associated with such retail municipal recommendations that create an incentive for a natural person who is an associated person of the Bank Dealer to place the interests of the Bank Dealer or such associated

person ahead of the interest of the retail customer; (c)(i) Identify and disclose any material limitations placed on the securities or investment strategies involving securities that may be recommended to a retail customer and any conflicts of interest associated with such limitations, in accordance with its Disclosure Obligation, and (ii) Prevent such limitations and associated conflicts of interest from causing the Bank Dealer to make retail municipal recommendations that place the interest of the Bank Dealer ahead of the interest of the retail customer; and (d) Identify and eliminate any sales contests, sales quotas, bonuses, and non-cash compensation that are based on the sales of specific municipal securities or specific types of municipal securities within a limited period of time.

Application of the Compliance Obligation to Bank Dealers

Consistent with Regulation Best Interest's Compliance Obligation, the proposed Best Interest Amendments would require a Bank Dealer to establish, maintain, and enforce written policies and procedures reasonably designed to achieve compliance with Regulation Best Interest.¹⁹

Purpose and Intent of the Best Interest Amendments

The MSRB is proposing the Best Interest Amendments to MSRB Rule G-19 for purposes of enhancing the standard of investor protection in the municipal securities

¹⁹ If a Bank Dealer's business model is such that it and its associated persons are not permitted to make any retail municipal recommendations, then a Bank Dealer may opt not to establish policies and procedures outlining the affirmative regulatory obligations pursuant to the Disclosure Obligation, Care Obligation, and Conflict of Interest Obligation. However, it would be prudent for a Bank Dealer to have policies and procedures that make clear that, prior to permitting the making of any such retail municipal recommendations, the Bank Dealer would need to establish policies and procedures reasonably designed to ensure compliance with the Best Interest Amendments to MSRB Rule G-19.

market and enhancing fairness and efficiency in the municipal securities market by promoting regulatory parity among Bank Dealers and Broker-Dealers. Specific to enhancing the standard of investor protection, the MSRB believes that all retail customers receiving a retail municipal recommendation should benefit from the enhanced investor protections afforded by Regulation Best Interest, regardless of whether such a retail customer is a customer of a Broker-Dealer or a Bank Dealer. Currently, retail customers of Bank Dealers are not afforded the protections of Regulation Best Interest when receiving a retail municipal recommendation from a Bank Dealer. The proposed Best Interest Amendments would require a Bank Dealer to comply with the enhanced standard of conduct required by Regulation Best Interest and, thereby, improve overall investor protection in the municipal securities market.

Specific to promoting regulatory parity, the MSRB believes that the proposed Best Interest Amendments would establish a uniform regulatory standard in the municipal securities market by requiring the same standard of conduct for Bank Dealers and Broker-Dealers when making retail municipal recommendations. This uniform standard would enhance the fairness and efficiency of the municipal securities market by ensuring Bank Dealers have regulatory obligations and burdens when engaging in retail municipal recommendations that are equivalent to the regulatory obligations and burdens of Broker-Dealers when engaging in the same municipal securities activities. This uniformity would better ensure that Bank Dealers do not have a competitive advantage in the municipal securities market by operation of a less burdensome regulatory standard of conduct and, thereby, mitigate the potential for regulatory arbitrage.

Background and Purpose of the Institutional SMMP Amendment

The proposed Institutional SMMP Amendment would amend MSRB Rule G-48 to modify the current obligation to perform a quantitative suitability analysis for recommendations where the dealer does not have actual control or de facto control over the account of an SMMP who is not a retail customer under Regulation Best Interest (collectively, “Institutional SMMPs” and, individually, each an “Institutional SMMP”).²⁰

Similar to the reduced customer-specific suitability obligations currently afforded to Institutional SMMPs under MSRB Rule G-48(c), the MSRB believes that dealers transacting with Institutional SMMPs should have similarly reduced quantitative-suitability obligations in instances where the dealer does not have actual control or de facto control over the account of an Institutional SMMP. This modification would effectively revert the quantitative suitability standard for Institutional SMMPs back to the longstanding standard that was in place under MSRB rules prior to June 30, 2020.²¹ The proposed Institutional SMMP Amendment is intended to improve the efficiency of the

²⁰ See supra note 10 for the applicable definition of “retail customer” and related citation. Any customer meeting such definition of retail customer pursuant to Regulation Best Interest would not be considered an Institutional SMMP for the purposes of the proposed Institutional SMMP Amendment and its modification to MSRB Rule G-48. For purposes of MSRB rules, such a customer meeting the definition of a “retail customer” would receive the protections afforded by Regulation Best Interest.

²¹ See Broker-Dealer Harmonization Filing, 85 FR at 28082, n. 4. The MSRB notes that it has had a long held prohibition against “churning,” and the MSRB formally “recast” this prohibition as quantitative suitability through an amendment to MSRB Rule G-19 approved by the SEC in 2014. See Exchange Act Release No. 71665 (Mar. 7, 2014), 79 FR 2432 (Mar. 13, 2014), File No. SR-MSRB-2013-07 (discussing the then-existing MSRB prohibition on churning and a proposed rule change to recast this prohibition using the phrase “quantitative suitability”), available at <http://www.msrb.org/~media/Files/SEC-Filings/2013/MSRB-2013-07-Fed-Reg-Approval.ashx?la=en&hash=AEDA0B5509630E25473E9F6F3A3F9C34>.

municipal securities market without eroding investor protection by aligning the compliance burden associated with certain recommendations made by dealers to the reasonable expectations and capabilities of Institutional SMMPs – who by their nature are more sophisticated, non-natural-person customers and must affirmatively indicate their capacity to (i) exercise independent judgment and (ii) access material information.²²

Background on MSRB Rule G-19's Quantitative Suitability Requirements

MSRB Rule G-19 sets the MSRB's baseline investor protection standards regarding the suitability of recommendations made by dealers to their customers of purchases, sales, or exchanges of municipal securities that are not subject to Regulation Best Interest. Among other requirements, Supplementary Material .05 of MSRB Rule G-19 enumerates three components of a dealer's suitability analysis when recommending a transaction or investment strategy involving a municipal security or municipal securities to a non-retail customer (i.e., a recommendation that is not subject to Regulation Best Interest).²³ As further defined in the text of the rule, MSRB Rule G-19 provides that a dealer's suitability obligation is composed of (i) reasonable-basis suitability, (ii) customer-specific suitability, and (iii) quantitative suitability. Most relevant to the proposed Institutional SMMP Amendment of this proposed rule change, quantitative suitability requires a dealer to have a reasonable basis for believing that a series of

²² See MSRB Rule G-48(c). See also related discussion infra under Background and Purpose of the Institutional SMMP Amendment - Background on MSRB Rule D-15 and SMMP Affirmation Requirements.

²³ See the Broker-Dealer Harmonization Filing, 85 FR at 28084. The Broker-Dealer Harmonization Filing amended MSRB Rule G-19 to provide that the rule does not apply to recommendations subject to Regulation Best Interest.

recommended transactions, even if suitable when viewed in isolation, are not excessive and unsuitable for the customer when taken together in light of the customer's investment profile, as delineated in MSRB Rule G-19.²⁴ No single test defines excessive activity, but factors such as the turnover rate, the cost-equity ratio, and the use of in-and-out trading in a customer's account may provide a basis for a finding that a dealer has violated the quantitative suitability obligation.²⁵

Pursuant to the amendments effectuated by the Broker-Dealer Harmonization Filing, discussed above and effective as of June 30, 2020, the quantitative suitability obligation of MSRB Rule G-19 no longer incorporates an element of control in relation to a customer's account.²⁶ As a result, dealers are currently obligated to conduct a quantitative suitability analysis under MSRB Rule G-19 when making recommendations to Institutional SMMPs, even in instances where the dealer does not have actual control or de facto control over the account. The obligation applies notwithstanding the fact that Institutional SMMPs self-identify under MSRB Rule G-48 and MSRB Rule D-15 as

²⁴ MSRB Rule G-19, Supplementary Material .05(c).

²⁵ Id.

²⁶ In other words, as of June 30, 2020, if the obligations of MSRB Rule G-19 attach to a dealer's recommendation, then the investor protections regarding quantitative suitability apply regardless of whether the dealer making the recommendation exercises any actual control or de facto control over the customer's account. The Broker-Dealer Harmonization Filing amended this language of Supplementary Material .05(c) to eliminate such control requirements, effectively extending the requirements of quantitative suitability to any customer account. See Broker-Dealer Harmonization Filing, 85 FR at 28084. June 30, 2020 was the compliance date for the amendments enacted by the Broker-Dealer Harmonization Filing. See Broker-Dealer Harmonization Filing, 85 FR at 28082, n. 4. Pursuant to the Broker-Dealer Harmonization Filing, the MSRB also notes that this quantitative suitability obligation applies uniformly to any dealer (i.e., the same regulatory obligations apply to both Broker-Dealers and Bank Dealers).

having the willingness and requisite investment sophistication to, for example, independently evaluate the recommendations of a dealer and the quality of a dealer's execution, as further discussed below.²⁷

Background on MSRB Rule G-48 and Modified Regulatory Obligations

MSRB Rule G-48 provides for modified dealer regulatory obligations under MSRB rules when dealing with certain customers that meet the definition of a Sophisticated Municipal Market Participant²⁸ (i.e., an SMMP). More specifically, when transacting with an SMMP customer, Rule G-48 modifies aspects of a dealer's baseline regulatory obligations in terms of: (i) time of trade disclosures,²⁹ (ii) transaction pricing,³⁰

²⁷ See MSRB Rule D-15(c) (requiring Institutional SMMPs to “affirmatively indicate,” among other things, that it is exercising independent judgment in evaluating (A) the recommendations of the dealer and (B) the quality of execution of the customer's transactions by the dealer).

²⁸ See discussion under Background and Purpose of the Institutional SMMP Amendment - Background on MSRB Rule D-15 and SMMP Affirmation Requirements near note 37 infra (discussing the definition of Sophisticated Municipal Market Participant under MSRB Rule D-15).

²⁹ MSRB Rule G-48(a) (“The broker, dealer, or municipal securities dealer shall not have any obligation under Rule G-47 to ensure disclosure of material information that is reasonably accessible to the market.”)

³⁰ MSRB Rule G-48(b).

(iii) bona fide quotations,³¹ (iv) best execution,³² and (vi) suitability.³³ The modified regulatory obligations afforded to SMMPs under MSRB rules are intended to account for the distinct capabilities of certain sophisticated, non-retail customers and the varied types of dealer-customer relationships occurring in the municipal securities market.³⁴

Most relevant to the proposed Institutional SMMP Amendment, Rule G-48(c) currently modifies the suitability requirements of MSRB Rule G-19 by eliminating the requirement for dealers to conduct a customer-specific suitability analysis for recommendations made to an Institutional SMMP.³⁵ The operative provision of MSRB Rule G-48 provides that, “[w]hen making a recommendation subject to Rule G-19 and

³¹ MSRB Rule G-48(d) (“The broker, dealer, or municipal securities dealer disseminating an SMMP’s ‘quotation’ as defined in Rule G-13, which is labeled as such, shall apply the same standards regarding quotations described in Rule G-13(b) as if such quotations were made by another broker, dealer, or municipal securities dealer.”)

³² MSRB Rule G-48(e) (“The broker, dealer, or municipal securities dealer shall not have any obligation under Rule G-18 to use reasonable diligence to ascertain the best market for the subject security and buy or sell in that market so that the resultant price to the SMMP is as favorable as possible under prevailing market conditions.”)

³³ MSRB Rule G-48(c).

³⁴ See, e.g., Exchange Act Release No. 67064 (May 25, 2012), 77 FR 32704 (June 1, 2012), File No. SR-MSRB-2012-05 (May 25, 2012) (approving an MSRB proposed rule change to relax certain qualifications for a dealer to afford a customer SMMP status in light of market developments regarding the increased availability of municipal securities market information and the desire of certain institutional customers to access alternative trading systems).

³⁵ Id. The amendments to MSRB Rule G-48 enacted by the Broker-Dealer Harmonization Filing carved out recommendations to customers that are subject to Regulation Best Interest from the rule’s modified standards. See Broker-Dealer Harmonization Filing, 85 FR at 28084-85.

not Regulation Best Interest, Rule 15l-1 under the Act, a broker, dealer, or municipal securities dealer shall not have any obligation under Rule G-19 to perform a customer-specific suitability analysis.”³⁶ This relaxed customer-specific suitability obligation is generally aligned with the “independent judgment” affirmations a customer seeking SMMP status makes under MSRB Rule D-15. The proposed Institutional SMMP Amendment would likewise relax the quantitative suitability obligation for similar reasons, as further described in the following sections.³⁷

Background on MSRB Rule D-15 and SMMP Affirmation Requirements

MSRB Rule G-48 incorporates the definition of SMMP under MSRB Rule D-15 for purposes of defining which customers do (or do not) qualify as an SMMP for purposes of Rule G-48 and, therefore, MSRB Rule D-15 establishes the scope of potential customers who might qualify for MSRB Rule G-48’s modified obligations. The SMMP definition of MSRB Rule D-15 enumerates three definitional components, which separately address: (i) the minimum qualifying traits and characteristics of an SMMP customer;³⁸ (ii) that a dealer must develop a reasonable basis for determining whether a

³⁶ MSRB Rule G-48(c).

³⁷ See Exchange Act Release No. 71665 (Mar. 7, 2014), 79 FR 14321 (Mar. 13, 2014), File No. SR-MSRB-2013-07 (Sept. 17, 2013) (codifying the relaxed customer-specific suitability obligation for recommendations made to SMMPs in MSRB Rule G-48 and the actual control or de facto control requirement, thereafter eliminated in 2020 as described herein, for the applicability of quantitative suitability to recommendations made to customers in MSRB Rule G-19).

³⁸ MSRB Rule D-15(a). A customer is only eligible to be treated as an SMMP if the customer is: (i) a bank, savings and loan association, insurance company, or registered investment company, (ii) a registered investment advisor, or (iii) a person or entity with total assets of at least \$50 million.

customer has the requisite level of expertise and sophistication to be deemed an SMMP customer (the “SMMP Reasonable Basis Determination”);³⁹ and (iii) what affirmations a customer must communicate to the dealer regarding its own investment judgment and access to information in order to be appropriately deemed an SMMP customer (the “SMMP Customer Affirmations”).⁴⁰ In terms of the SMMP Customer Affirmations, MSRB Rule D-15(c) provides that the customer must affirmatively indicate to the dealer that (i) it is exercising independent judgment in evaluating the recommendations of the dealer; the quality of execution of the customer’s transactions by the dealer; and the transaction price for non-recommended secondary market agency transactions as to which the dealer’s services have been explicitly limited to providing anonymity, communication, order matching and/or clearance functions and the dealer does not exercise discretion as to how or when the transactions are executed;⁴¹ and (ii) it has

³⁹ MSRB Rule D-15(b). A customer is only eligible to be treated as an SMMP if the dealer has developed a reasonable basis to believe that the customer is capable of evaluating investment risks and market value independently, both in general and with regard to particular transactions and investment strategies in municipal securities. In addition, Supplementary Material .01 of MSRB Rule D-15 states that, as part of the reasonable-basis analysis, the dealer should consider the amount and type of municipal securities owned or under management by the customer.

⁴⁰ MSRB Rule D-15(c).

⁴¹ See MSRB Rule D-15(c)(1) (“The customer must affirmatively indicate that it: (1) is exercising independent judgment in evaluating: (A) the recommendations of the dealer; (B) the quality of execution of the customer’s transactions by the dealer; and (C) the transaction price for non-recommended secondary market agency transactions as to which (i) the dealer’s services have been explicitly limited to providing anonymity, communication, order matching and/or clearance functions and (ii) the dealer does not exercise discretion as to how or when the transactions are executed . . .”).

timely access to material information that is available publicly through established industry sources as defined in MSRB Rule G-47(b)(i) and MSRB Rule G-47(b)(ii) (i.e., “material information” from “established industry sources,” such as EMMA website information and rating agency reports).⁴²

Thus, an institutional customer who self-identifies as an SMMP has freely affirmed to a dealer its willingness to be treated as a sophisticated customer with the capacity and resources to exercise its own independent judgment. In this way, the SMMP Customer Affirmations are designed to ensure that any customer treated as an SMMP has affirmatively and knowingly provided the grounds on which a dealer may afford such SMMP customer lesser protections under certain MSRB rules. As an additional investor protection safeguard beyond the requirement for SMMP Customer Affirmations, the SMMP Reasonable Basis Determination also requires a dealer to have a reasonable basis to believe that an SMMP customer is capable of evaluating investment risks and market value independently, both in general and with regard to particular transactions and investment strategies in municipal securities.⁴³ In this way, the SMMP Reasonable Basis Determination further ensures that an Institutional SMMP does in fact possess a more sophisticated understanding of the municipal securities market. Importantly, the proposed Institutional SMMP Amendment would not alter the SMMP Customer Affirmations, the

⁴² See MSRB Rule D-15(c)(2) (“The customer must affirmatively indicate that it . . . (2) has timely access to material information that is available publicly through established industry sources as defined in Rule G-47(b)(i) and (ii).”)

⁴³ See MSRB Rule D-15(b) and Rule D-15 Supplementary Material .01.

SMMP Reasonable Basis Determination, nor any of the other definitional elements of MSRB Rule D-15.

Purpose and Intent of the Institutional SMMP Amendment to MSRB Rule G-48

The proposed Institutional SMMP Amendment would amend MSRB Rule G-48 to modify the quantitative suitability obligations of dealers when effecting transactions for their Institutional SMMPs. The proposed Institutional SMMP Amendment would require a dealer to conduct a quantitative suitability analysis only in situations where the dealer has actual control or de facto control over an Institutional SMMP's account.⁴⁴ As stated above, the proposed amendments to MSRB Rule G-48 would narrowly reinstate the scope of suitability protections afforded to Institutional SMMPs in effect prior to the amendments effectuated by the Broker-Dealer Harmonization Filing and so should be a familiar regulatory concept to dealers and Institutional SMMPs alike.⁴⁵ More importantly, because each Institutional SMMP must self-identify as an SMMP by making the SMMP Customer Affirmations, as well as must fulfill the requirements associated with a dealer's SMMP Reasonable Basis Determination, the MSRB believes that the proposed Institutional SMMP Amendment will ease a regulatory burden on dealers that effectively

⁴⁴ Where a dealer exercises actual control or de facto control over an Institutional SMMP's account, the dealer would still be required to perform a quantitative suitability analysis in accordance with Supplementary Material .05 of MSRB Rule G-19. Relatedly, if an Institutional SMMP limitedly provides its customer affirmation on a trade-by-trade basis, then the dealer would be required to comply with all aspects of MSRB Rule G-19, including both the quantitative suitability requirement and the customer-specific suitability requirement, for those recommendations for which the Institutional SMMP did not provide the applicable customer affirmation. See Supplementary Material .02 of MSRB Rule D-15 (discussing trade-by-trade affirmations).

⁴⁵ See supra note 21 and related discussion.

replicates the sort of analysis an Institutional SMMP is willing and capable of performing itself. As a result, the proposed Institutional SMMP Amendment would align the compliance burden associated with certain recommendations made by dealers to the reasonable expectations and capabilities of Institutional SMMPs.

While the investor protection benefits associated with requiring dealers to perform a potentially duplicative suitability analysis can be appropriate in other circumstances,⁴⁶ the MSRB believes that the compliance burden associated with performing a quantitative suitability analysis on recommendations made to Institutional SMMPs outweighs the potential marginal investor protection benefits. In this way, the proposed Institutional SMMP Amendment would promote efficiency in the municipal securities market by eliminating a regulatory burden on dealers that generally provides a duplicative or unneeded analyses in supplement of an Institutional SMMPs' own independent and informed judgment, and, consequently, the proposed Institutional SMMP Amendment would allow dealers to redirect the resources associated with this regulatory burden to other more productive market activities.

2. Statutory Basis

The MSRB believes that the proposed rule change is consistent with Section 15B(b)(2) of the Act,⁴⁷ which provides that the Board shall propose and adopt rules to

⁴⁶ For example, the MSRB believes that the obligation to perform quantitative suitability analyses under MSRB rules remains appropriate, regardless of the potential for such duplication, in circumstances of recommendations made to retail customers; non-retail, institutional customers who fail to meet the characteristics of an SMMP; and/or non-retail customers who have declined to make the affirmations necessary to be appropriately deemed an SMMP.

⁴⁷ 15.U.S.C. 78o-4(b)(2).

effect the purposes of this title with respect to transactions in municipal securities effected by brokers, dealers, and municipal securities dealers and advice provided to or on behalf of municipal entities or obligated persons by brokers, dealers, municipal securities dealers, and municipal advisors with respect to municipal financial products, the issuance of municipal securities, and solicitations of municipal entities or obligated persons undertaken by brokers, dealers, municipal securities dealers, and municipal advisors.⁴⁸

Section 15B(b)(2)(C) of the Act⁴⁹ provides that the MSRB's rules shall be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest.⁵⁰ The MSRB believes the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act⁵¹ for the following reasons.

Statutory Basis for the Best Interest Amendments

⁴⁸ Id.

⁴⁹ 15 U.S.C. 78o-4(b)(2)(C).

⁵⁰ Id.

⁵¹ Id.

The proposed Best Interest Amendments are consistent with Section 15B(b)(2)(C) of the Act⁵² because the amendments would: foster cooperation and coordination with regulators; prevent fraudulent and manipulative acts and practices; protect investors; remove impediments to and perfect the mechanism of a free and open market in municipal securities; and promote capital formation in the municipal securities market.

Fostering Cooperation and Coordination with Regulators

The proposed Best Interest Amendments would foster cooperation and coordination with regulators by more tightly aligning the suitability obligations of MSRB Rule G-19 with the suitability obligations of Regulation Best Interest. By providing a uniform standard for all types of dealers, this alignment of the regulatory scheme applicable to retail municipal recommendations will foster greater cooperation and coordination among the MSRB and the SEC, as well as greater cooperation and coordination among the authorities that examine Broker-Dealers and Bank Dealers for compliance with MSRB rules.

Protecting Investors and Preventing Fraudulent and Manipulative Act and Practices

The proposed Best Interest Amendments would protect investors and prevent fraudulent and manipulative acts and practices by extending the enhanced standards of conduct required by Regulation Best Interest to the retail municipal recommendations of Bank Dealers. As noted by the Commission in the adopting release for Regulation Best Interest, Regulation Best Interest enhances the broker-dealer standard of conduct beyond existing suitability obligations, and aligns the standard of conduct with retail customers'

⁵² Id.

reasonable expectations by requiring broker-dealers, among other things, to: act in the best interest of the retail customer at the time the recommendation is made, without placing the financial or other interest of the broker-dealer ahead of the interests of the retail customer; and address conflicts of interest by establishing, maintaining, and enforcing policies and procedures reasonably designed to identify and fully and fairly disclose material facts about conflicts of interest, and in instances where we have determined that disclosure is insufficient to reasonably address the conflict, to mitigate or, in certain instances, eliminate the conflict.⁵³

In addition, the Commission stated the enhancements contained in Regulation Best Interest are designed to improve investor protection by enhancing the quality of broker-dealer recommendations to retail customers and reducing the potential harm to retail customers that may be caused by conflicts of interest.⁵⁴ For the same reasons, the MSRB believes that extending Regulation Best Interest to the retail municipal recommendations of Bank Dealers would prevent potential fraudulent and manipulative acts and practices and promote the protection of the retail customers of Bank Dealers.

Removing Impediments and Perfecting the Mechanisms of a Free and Open Market

The proposed Best Interest Amendments would remove impediments to and perfect the mechanism of a free and open market in municipal securities by applying a uniform regulatory standard for retail municipal recommendations that would promote parity regarding the regulatory obligations of Broker-Dealers and Bank Dealers and,

⁵³ Regulation Best Interest Adopting Release, 84 FR at 33318.

⁵⁴ Regulation Best Interest Adopting Release, 84 FR at 33321.

thereby, reduce potential confusion among market participants as to which standard of conduct applies.

Promoting Capital Formation

The proposed Best Interest Amendments would not have a deleterious effect on capital formation in the municipal securities market and would have the potential to improve capital formation for the following reasons. Similar to the Commission's reasoning in its adoption of Regulation Best Interest,⁵⁵ the enhanced obligations of Regulation Best Interest may increase the efficiency of retail municipal recommendations and increase the attractiveness of Bank Dealer services for those retail customers who do not invest with a Bank Dealer because recommendations made by bank dealers are not currently subject to the additional standards of investor protection afforded by Regulation Best Interest. Additionally, by adopting a uniform regulatory standard for retail municipal recommendations across all dealers (*i.e.*, across Bank Dealers and Broker-Dealers), the overall attractiveness of the municipal securities activities of dealers may improve. Consequently, if more retail customers are more willing to participate in municipal securities activities, then the proposed Best Interest Amendments would promote capital formation in the municipal securities market.

Statutory Basis for the Institutional SMMP Amendment

⁵⁵ Regulation Best Interest Adopting Release, 84 FR at 33462 ("The possibility that Regulation Best Interest may increase the efficiency of the recommendations provided by the associated persons of the broker-dealer may enhance the attractiveness of broker-dealer services for those investors who currently do not invest through broker-dealers. . . If retail customers are more willing to participate in the securities markets through broker-dealers, Regulation Best Interest would have a positive effect on capital formation.")

The proposed Institutional SMMP Amendment is consistent with Section 15B(b)(2)(C)⁵⁶ of the Act because the amendment would facilitate transactions in municipal securities and remove impediments to and perfect the mechanism of a free and open market in municipal securities, while not compromising investor protection.

The proposed Institutional SMMP Amendment would facilitate transactions in municipal securities and remove impediments to and perfect the mechanism of a free and open market in municipal securities by reducing a compliance burden on dealers. The modification of a dealer's suitability obligations to eliminate the current requirement to perform a quantitative suitability analysis for recommendations in circumstances where the dealer does not have actual control or de facto control over an Institutional SMMP's account will eliminate what could potentially be duplicative analyses undertaken by dealers on behalf of Institutional SMMPs – analyses which Institutional SMMPs have already affirmed their capacity and expertise to conduct for themselves, and which the Institutional SMMPs presumably have taken upon themselves to perform. In this regard, the proposed Institutional SMMP Amendment will remove an impediment to the mechanisms of a free and open market in municipal securities and promote greater efficiency. By eliminating this regulatory burden, the proposed Institutional SMMP Amendment would allow dealers to redirect the resources associated with this regulatory burden to other more productive market activities. As a separate, but related benefit, the MSRB believes that the Institutional SMMP Amendment would allow dealers to more efficiently serve those Institutional SMMPs who may be seeking relatively greater

⁵⁶ 15 U.S.C. 78o-4(b)(2)(C).

transaction activity and/or are more comfortable taking on the risks associated with more frequent transaction activity.

The MSRB believes that the proposed Institutional SMMP Amendment to MSRB Rule G-48 will not compromise investor protections. The MSRB believes that allowing dealers to make recommendations to their Institutional SMMP customers without the burden of performing a quantitative suitability analysis is consistent with the SMMP Customer Affirmations and dealers' SMMP Reasonable Basis Determination. More specifically, the SMMP Customer Affirmations ensure that an Institutional SMMP itself believes that it has the requisite knowledge and judgment to be afforded SMMP status; and, as an additional safeguard to investor protection, the SMMP Reasonable Basis Determination separately ensures that the dealer also has a reasonable basis to conclude that an Institutional SMMP has the knowledge and sophistication to be treated as a SMMP based on supplemental factors beyond just the SMMP Customer Affirmations. If either definitional prong is not met, a dealer is not permitted to afford an institutional customer the status of a SMMP. Therefore, the MSRB believes that the proposed Institutional SMMP Amendment is generally consistent with an Institutional SMMP's more sophisticated understanding of (i) the commercial nature of its relationship with a dealer and (ii) the lesser regulatory standards of conduct governing the SMMP-dealer relationship.

In addition, the proposed Institutional SMMP Amendment would incorporate the concepts of actual control or de facto control. Reinstating these control elements would help address potential scenarios in which the ability of an Institutional SMMP to exercise independent judgment is undermined or circumvented, such as when a dealer may not

have formal discretionary authority over an Institutional SMMP's account, but nevertheless exercises de facto control over the account to, for example, engage in churning activity in clear contravention of an Institutional SMMP's investment interests.⁵⁷ The MSRB believes that incorporating the actual control or de facto control elements maintains baseline investor protections for Institutional SMMPs in such scenarios of greater dealer impropriety or intentional wrongdoing.

The MSRB also notes that new institutional customers, who otherwise would qualify as SMMPs but desire the additional investor protections afforded by quantitative suitability under MSRB Rule G-19, can decline to provide the required affirmations under MSRB Rule D-15.⁵⁸ Similarly, existing Institutional SMMPs could withdraw their SMMP status and obtain the suitability protections afforded by MSRB Rule G-19. This ability to self-identify as an Institutional SMMP will ensure that those institutional customers who desire additional investor protection can secure them under MSRB rules, and thus, require the dealers to undertake a quantitative suitability analysis.

Accordingly, the MSRB believes that the proposed Institutional SMMP Amendment would maintain essential safeguards for investor protection and, overall, not compromise investor protections inconsistent with Section 15B(b)(2)(C)⁵⁹ of the Act.

⁵⁷ See, e.g., Harry Gliksmann, 54 S.E.C. 471, 475 (1999) (upholding a NASD finding that a registered representative violated his suitability obligations by recommending frequent and short-term securities transactions even though the registered representative did not have written discretionary authority).

⁵⁸ See related discussion supra under Background and Purpose of the Institutional SMMP Amendment – Background on MSRB Rule D-15 and SMMP Affirmation Requirements. See also MSRB Rule D-15(c)(1)-(2).

⁵⁹ 15 U.S.C. 78o-4(b)(2)(C).

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15B(b)(2)(C) of the Act⁶⁰ requires that MSRB rules not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act. The MSRB considered the economic impact associated with the proposed rule change, including a comparison to reasonable alternative regulatory approaches, relative to the baseline.⁶¹ The MSRB believes the proposed rule changes would relieve a burden on competition and do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

Necessity of Rule Change

Best Interest Amendments

As previously mentioned, the retail municipal recommendations made by Bank Dealers currently are outside the scope of Regulation Best Interest,⁶² and the municipal securities activities of Bank Dealers continue to be subject to the existing investor protection obligations of MSRB rules, including MSRB Rule G-19. The proposed Best Interest Amendments to MSRB Rule G-19 would require each Bank Dealer to comply

⁶⁰ Id.

⁶¹ See Policy on the Use of Economic Analysis in MSRB Rulemaking, available at <http://msrb.org/Rules-and-Interpretations/Economic-Analysis-Policy.aspx>. In evaluating whether there was a burden on competition, the Board was guided by its principles that required the Board to consider costs and benefits of a rule change, its impact on capital formation and the main reasonable alternative regulatory approach.

⁶² Regulation Best Interest applies to “a broker, dealer or a natural person who is an associated person of a broker or dealer,” which does not apply Bank Dealers. See 17 CFR § 240.15c-1(a)(1).

with the requirements of Regulation Best Interest to the same extent as a Broker-Dealer must. The proposed Best Interest Amendments are necessary because they would increase investor protection in the municipal securities market by creating regulatory uniformity in the market between the municipal securities activities of Bank Dealers and those of Broker-Dealers, each of whom may provide retail municipal recommendations. Similar to the Broker-Dealer Harmonization Filing for Broker-Dealers in 2020, the MSRB believes another benefit of the proposed Best Interest Amendments is that the amendments would reduce agency costs and information asymmetry between Bank Dealers and retail customers.⁶³

The MSRB addresses reasonable alternatives where applicable when considering the costs, benefits, and impact of a proposed amendment. The MSRB believes the only reasonable alternative for evaluation is the option of leaving in place the current regulatory state in which a Bank Dealer's retail municipal recommendations are not subject to the requirements of Regulation Best Interest, while a Broker-Dealer's retail municipal recommendations are subject to the full requirements of Regulation Best Interest, even though the activities of both groups of dealers are similar. As shown below, the MSRB believes that maintaining the status quo would preserve a regulatory imbalance and therefore competitive imbalance in this regard between Bank Dealers and

⁶³ The SEC describes this reduction in agency cost, in the Regulation Best Interest Adopting Release, as “the difference between the net benefit to the retail customer from accepting a less than efficient recommendation about a securities transaction or investment strategy, where the associated person or Broker-Dealer puts its interests ahead of the interests of the retail customer, and the net benefit the retail customer might expect from a similar securities transaction or investment strategy that is efficient for him or her.” See Regulation Best Interest Adopting Release, 84 FR at 33403.

Broker-Dealers engaged in the same activity, as well as deprive certain retail customers of the investor protections afforded by Regulation Best Interest. In this way, maintaining the status quo would maintain a discrepancy in the investor protections afforded to the retail customers receiving retail municipal recommendations from Bank Dealers as compared to the investor protections afforded to retail customers receiving retail municipal recommendations from Broker-Dealers and, thereby, maintain a competitive imbalance in terms of the compliance burdens of Bank Dealers versus Broker-Dealers.

Institutional SMMP Amendment

The purpose of amending MSRB Rule G-48 is to reinstate the requirement that a dealer have actual control or de facto control with respect to Institutional SMMP accounts to trigger a dealer's quantitative suitability obligation. A prior rule provision, applying the quantitative suitability obligation only when a dealer had actual control or de facto control over the account, was removed as part of the Broker-Dealer Harmonization Filing; and, as a result, dealers currently have an obligation to conduct a quantitative suitability analysis for transactions with Institutional SMMP customers whether or not the dealer has actual control or de facto control over the Institutional SMMP's account. The proposed Institutional SMMP Amendment to MSRB Rule G-48 will clarify that the quantitative suitability requirement of MSRB Rule G-19 is only applicable to natural person SMMPs but not to Institutional SMMPs. Since the proposed Institutional SMMP Amendment reinstates a previous requirement in the MSRB's suitability rule, the MSRB considered the alternative of placing the reinstated requirement in MSRB Rule G-19 for all institutional entities but decided that MSRB Rule G-48 is a more appropriate place to incorporate the reinstated standard, as Institutional

SMMPs are by their nature sophisticated entities that have freely affirmed and self-identified their capacity to independently evaluate dealers' recommendations.

Benefits, Costs and Effect on Competition

Best Interest Amendments

The proposed Best Interest Amendments to MSRB Rule G-19 would help create a uniform standard of investor protection for retail municipal recommendations. The proposed Best Interest Amendments to MSRB Rule G-19 would obligate a Bank Dealer to comply with Regulation Best Interest to the same extent as a Broker-Dealer making retail municipal recommendations. In this regard, the MSRB believes the effects of the proposed Best Interest Amendments would be similar and comparable to the effects resulting from when Broker-Dealers were first required to comply with Regulation Best Interest, though at a much smaller scale concerning only retail municipal recommendations.⁶⁴ Therefore, the MSRB believes that the SEC's estimates of the burdens on competition and benefits of applying Regulation Best Interest to Broker-Dealers is a reasonable reference point for analyzing burdens on competition and benefits of applying Regulation Best Interest to Bank Dealers' retail municipal recommendations. The MSRB therefore built upon the findings of the SEC's multiyear in-depth analysis for its analysis of the proposed Best Interest Amendments.

Notably, in the Regulation Best Interest Adopting Release, the SEC emphasized that it is "difficult to quantify such benefits and costs with meaningful precision" for Broker-Dealers and, particularly over long time periods, the quantification may be

⁶⁴ See Regulation Best Interest Adopting Release, 84 FR at 33403.

insufficiently precise and inherently speculative,⁶⁵ mainly due to the following factors, among others, (i) a lack of data on the extent to which Broker-Dealers with different business practices engage in disclosure and conflict mitigation activities to comply with existing requirements, and therefore how costly it would be to comply with the proposed requirements;⁶⁶ (ii) Regulation Best Interest provides Broker-Dealers flexibility in how to comply with the obligations and, as a result, there could be multiple ways in which Broker-Dealers will satisfy their obligations;⁶⁷ and (iii) Regulation Best Interest may affect Broker-Dealers differently depending on their business model (e.g., full-service Broker-Dealer, Broker-Dealer that uses independent contractors, insurance-affiliated Broker-Dealer) and size.⁶⁸

The SEC further cautioned that the associated costs for each individual Broker-Dealer firm could not be anticipated because of the wide variation in size and scope of business practices across firms as well as the many unknown factors associated with the principles-based nature of the Regulation Best Interest.⁶⁹ The MSRB believes the same difficulties and complexities experienced by the SEC in attempting to analyze the economic effects of applying Regulation Best Interest to Broker-Dealers also applies to

⁶⁵ Id. The MSRB is not aware of any post-implementation study or other analysis that provides data on the costs and benefits of adopting Regulation Best Interest.

⁶⁶ See Regulation Best Interest Adopting Release, 84 FR at 33434.

⁶⁷ Id.

⁶⁸ Id.

⁶⁹ Id.

the MSRB's attempt to provide a meaningful quantitative estimate of the impact of the proposed Best Interest Amendments on Bank Dealers.⁷⁰

While acknowledging these challenges, the MSRB attempted to determine the scope of activity that would be subject to the proposed Best Interest Amendments, which is summarized in Table 1 below. The summary table provides an estimate of the number of Bank Dealers likely to be affected by the proposed Best Interest Amendments. The Bank Dealers were included in that table based on their market share of retail-sized dealer-to-customer trades in calendar year 2020 (i.e., dealer-to-customer trades with a par value of \$100,000 or less).⁷¹ Among the over 1,200 dealers registered with the MSRB, only 21 firms are registered as Bank Dealers. Those 21 Bank Dealers conducted only 1.6% of all retail-sized dealer-to-customer trades in municipal securities in 2020.⁷² Even

⁷⁰ The MSRB sought public comment to solicit data to use in a quantitative analysis relating to the proposed changes in its Request for Comments. While commenters did provide some specifics on the scope of Bank Dealers' activities that would be subject to the proposed Best Interest Amendments, the MSRB did not receive any quantitative estimate of the impact of the proposed Best Interest Amendments on Bank Dealers. In addition, the MSRB is not aware of any post-implementation study that provides data on the costs and benefits of adopting Regulation Best Interest.

⁷¹ The MSRB does not have access to reliable data to determine the precise number of Bank Dealers who provide (or may provide) recommendations to investors who meet the definition of a retail customer. To develop a reasonable proxy, the MSRB analyzed market data to determine the number of retail-sized trades (par value at \$100,000 or less in this case). In the absence of more specific data about a trade, total par size of \$100,000 or less is commonly used in the municipal securities market as an indicator of a retail activity. Data were obtained from the MSRB's Real-Time Transaction Reporting System (RTRS) and the MSRB's registration database.

⁷² These figures are provided by an MSRB analysis with data obtained from MSRB's Real-Time Transaction Reporting System (RTRS) combined with existing registration data.

among the 21 Bank Dealers, nearly all of this activity was concentrated in a small number of firms, with the top seven most-active Bank Dealers conducting the vast majority of all retail-sized customer trades in 2020 (about 99.5%). The remaining number of registered Bank Dealers were significantly less active in executing retail-sized trades with customers during that same period, with six Bank Dealers not executing any retail-sized customer trades over the course of the entire year and the remaining eight Bank Dealers altogether averaging a little over one retail-sized customer trade per day.

Table 1:
Market Share of Municipal Securities
Retail-Sized Customer Trades by Dealers
January 2020 – December 2020

Type of Dealers	Number of Retail-Sized Customer Trades	Market Share of Retail-Sized Customer Trades
Non-Bank Dealers	3,865,880	98.4%
Top Seven Bank Dealers	61,140	1.6%
All Fourteen Other Bank Dealers	325	0.0%

Source: MSRB analysis with data obtained from the MSRB's Real-Time Transaction Reporting System (RTRS) and the MSRB's registration database.

In developing these numbers, the MSRB believes they are likely overly inclusive of potential retail activity, because there is a high probability the numbers capture more trades than would be subject to the requirements of the proposed Best Interest Amendments. Nevertheless, the MSRB believes the numbers are a reasonable estimate for the purpose of this economic analysis and are conservative to the extent that they are more likely to over-estimate the potential burden on Bank Dealers than underestimate it. In terms of the limitations of this data, dealer-to-customer trades with a par value of \$100,000 or less are not always conducted with investors who would meet the definition

of a retail customer under Regulation Best Interest, as representatives acting on behalf of non-retail customers potentially execute trades with a par value of \$100,000 or less (i.e., small institutional trades). Conversely, retail investors may execute trades above \$100,000 par value (i.e., large retail trades); however, the MSRB believes large retail trades occur less frequently and, thus, do not fully offset the more frequent occurrences of sub-\$100,000 par value non-retail trades.⁷³

Additionally, the MSRB acknowledges that the number of trades is not a reasonable proxy for the number of retail municipal recommendations. That is, the fact that a Bank Dealer executes a trade with an investor who meets the definition of a retail customer under Regulation Best Interest does not necessarily mean that the Bank Dealer has made a “recommendation” to such retail customer for purposes of Regulation Best Interest. The Bank Dealer may have, for example, executed a non-recommended trade at the customer’s request. Hence, the MSRB believes that some unknown number of these retail-sized trades would not be subject to the proposed Best Interest Amendments (i.e., the trades would not be subject to Regulation Best Interest).

Benefits

⁷³ For example, one commenter, the Capital Markets Group of Commerce Bank (“CMG”) based in Kansas City, MO, stated that “For CMG, retail customers comprise approximately 9% of CMG’s total open account customer base. Further, only a portion of these retail accounts actually executed transactions in the last 12 months, comprising approximately 3% of CMG’s total customers” See letter from Erik Swanson, Managing Director, and Joseph Reece, Chief Compliance Officer, Capital Markets Group of Commerce Bank (“Commerce Bank”), not dated (the “Commerce Bank Letter”) in response to MSRB Notice 2021-06 (March 4, 2021).

The MSRB believes extending the requirements of Regulation Best Interest to Bank Dealers would reduce or eliminate a regulatory imbalance between Bank Dealers, on the one hand, and Broker-Dealers, on the other, as the terms of Regulation Best Interest do not currently apply to Bank Dealers. The proposed Best Interest Amendments would both close a regulatory gap and also mitigate certain market risks and inefficiencies associated with a potentially lower compliance standard.⁷⁴ Therefore, the proposed Best Interest Amendments would protect retail customers seeking investment recommendations and transacting in municipal securities, regardless of whether they are customers of a Broker-Dealer or a Bank Dealer. The MSRB believes retail customers receiving retail municipal recommendations should benefit from a uniform standard of enhanced investor protections, which would not be dependent upon the type of dealer entity making the retail municipal recommendation.

As to the overall merit of the proposed new requirements, they are intended to reduce Bank-Dealer retail customer agency costs by lessening conflicts of interest that currently exist between Bank Dealers and retail customers and reduce information asymmetries limiting the ability of retail customers to assess the efficiency of recommendations from Bank Dealers.⁷⁵

⁷⁴ As one potential example, where a Bank Dealer and a Broker-Dealer are both subsidiary entities of a common parent holding company, the MSRB is concerned that the parent holding company may attempt to take advantage of any regulatory imbalance by utilizing a regulatory arbitrage strategy to move retail customer accounts to the subsidiary with the lowest compliance standard, and, thus, Broker-Dealers may relocate retail customers accounts to affiliated Bank Dealers to avoid compliance with Regulation Best Interest.

⁷⁵ For a detailed discussion of the economic theory behind agency costs, please refer to the Regulation Best Interest Adopting Release, 84 FR at 33400-41.

Costs

If the proposed Best Interest Amendments were enacted, the MSRB believes Bank Dealers would experience initial costs associated with establishing the revised policies and procedures to comply with the requirements of Regulation Best Interest, as well as the costs of ongoing compliance. The initial setup costs likely would be proportionately higher for smaller and less active Bank Dealers with fewer retail municipal recommendations than for the larger and more active Bank Dealers with more retail municipal recommendations, while the ongoing costs would likely be proportionate with each Bank Dealer's retail business activities. Additionally, Bank Dealers with an affiliated Broker-Dealer that is subject to Regulation Best Interest likely would not experience as much initial set-up costs as other Bank Dealers because they can leverage established policies and procedures from their Broker-Dealers affiliates presumably in compliance with Regulation Best Interest.

The MSRB believes the average per-firm total costs (initial and ongoing) would be substantially lower for a Bank Dealer providing retail municipal recommendations that are *only* related to municipal securities, as compared to the overall costs associated with a Broker-Dealer providing recommendations to retail customers of securities transactions or investment strategies involving securities related to many different types of securities. On average, there are many more retail-sized trades in other types of securities – for example, equities, corporate bonds, treasury and agency securities, options, convertible bonds, mutual funds, and exchange-traded funds – than in municipal securities alone.⁷⁶ A

⁷⁶ Based on the MSRB's estimate, there were approximately five million retail-sized customer trades in municipal securities in 2018, compared to 6.8 million retail-sized customer trades in corporate bonds, 132.5 million retail-sized customer

Broker-Dealer subject to Regulation Best Interest incurs compliance costs any time it provides a recommendation to its retail customers on any security, while a Bank Dealer would only incur cost when it provides a retail municipal recommendation. As a result, the MSRB believes the average per-Bank Dealer total costs would not approach the per-Broker-Dealer level, as estimated by the SEC in relation to Regulation Best Interest. Table 2 provides an illustration of potential costs to be expected for a Bank Dealer with an average number of retail-sized trades in municipal securities as a result of the proposed rule change. Using the SEC's estimates of initial cost and ongoing cost for 2,766 Broker-Dealers, the MSRB estimated the portion of the costs attributable to municipal securities only for a Broker-Dealer with an average number of retail-sized trades in municipal securities, with the assumption that the same Broker-Dealer would incur only 35% of the initial cost and one percent of the ongoing cost if the Broker-Dealer only provided recommendations on municipal securities to retail customers.⁷⁷ The MSRB then applied the cost estimates to an average Bank Dealer.

trades in treasury securities and 4.4 billion retail-sized customer trades in equities, which include exchange-traded funds.

⁷⁷ The MSRB's analysis focuses on four securities that have substantial retail customer trades: municipal securities, corporate bonds, treasury securities and equities, which include exchange-traded funds. To be conservative, all other securities, such as stock options, federal agency securities, mortgage-backed securities, asset-backed securities, mutual funds, etc., are assumed to have no retail trades. For the initial cost, the MSRB assumes a cost saving of 65% when establishing policies and procedures for one security only, municipal bonds, as opposed to for four securities, accounting for some fixed costs when working on a single security product. For the ongoing cost, the MSRB estimated the number of retail-sized customer trades for municipal securities that are likely based on a Broker-Dealer's recommendation relative to comparable retail-sized customer trades for corporate bonds, treasury securities and equities (including exchange-traded funds), and derived that the proportion for municipal securities would be less than one percent of the total. Conservatively, one percent is used for estimating the ongoing costs related to municipal securities. Data were obtained

Table 2:
Estimated Initial Setup and Ongoing Compliance Costs for an Average Bank Dealer

	Initial Cost	Ongoing Cost	Number of Retail-Sized Customer Trades
SEC Estimate			
Average Broker-Dealer (Non-Bank Dealer)	\$ 2,153,290	\$ 855,897	
Average Broker-Dealer Trading Municipal Bonds Only	\$ 753,651	\$ 8,559	5,523
Apply SEC Estimate to Average Bank Dealer Trading Municipal Bonds	\$ 753,651	\$ 4,590	2,962

Source: MSRB analysis with data obtained from the MSRB's Real-Time Transaction Reporting System (RTRS), MSRB's registration data and SEC's estimates of costs and benefits of applying Regulation Best Interest to Broker-Dealers.⁷⁸

Effect on Competition, Efficiency, and Capital Formation⁷⁹

The MSRB believes that, if the proposed Best Interest Amendments were adopted, there is a possibility some Bank Dealers that rarely execute retail-sized customer trades, assuming those trades represent retail municipal recommendations, may choose to forgo retail business entirely to avoid the costs of compliance with proposed Best Interest Amendments and Regulation Best Interest, or more narrowly, stop providing retail municipal recommendations to limit the costs of compliance. Therefore, some Bank Dealers may be impacted by the proposed Regulation Best Interest Amendments by deciding to forego retail municipal recommendations or retail customer business

from the MSRB's Real-Time Transaction Reporting System (RTRS), MSRB's registration database, and SEC's estimates of costs and benefits of applying Regulation Best Interest to Broker-Dealers.

⁷⁸ See Regulation Best Interest Adopting Release, 84 FR at 33318.

⁷⁹ Capital formation is defined by the SEC on their website "What we do," available at <https://www.sec.gov/about/what-we-do#section2>. It refers to companies and entrepreneurs accessing America's capital markets to help them create jobs, develop innovations and technology, and provide financial opportunities for those who invest in them. Id.

altogether, though the broader impact on competition in the municipal securities market is expected to be minor given these Bank Dealers' relatively minor presence in executing retail-sized trades for municipal securities currently; accordingly, even if those Bank Dealers choose to relinquish their retail business, there should not be any significant reduction in the supply of services to retail investors. On the other hand, the MSRB does not expect a significant alteration to the competitive landscape from retail investors' perspective if the proposed Best Interest Amendments were adopted, as retail investors rarely use Bank Dealers for retail trading. Moreover, for those retail investors who do choose Bank Dealers to conduct retail activities, their activities are concentrated in a small number of Bank Dealers who are less likely to withdraw from the retail business as a result of the burdens created by the proposed Best Interest Amendments.

The MSRB believes requiring Bank Dealers to comply with the requirements of Regulation Best Interest, when making retail municipal recommendations, would improve market efficiency by imposing the same requirements on Bank Dealers when making such recommendations as on Broker-Dealers under Regulation Best Interest. The harmonization of MSRB rule requirements for Bank Dealers with SEC requirements for Broker-Dealers would create consistency for firms who have both Broker-Dealer and Bank Dealer subsidiaries, and, thus, would increase efficiency in terms of firms' compliance burdens. It also may encourage competition for retail customers among Bank Dealers (and between Bank Dealers and Broker-Dealers in some instances) to the extent that the disclosure of fees and conflicts of interest would increase transparency and facilitate more comparability across Bank Dealers and Broker-Dealers among retail investors, and, therefore, would further inform customers' decisions of whether to utilize

a Bank Dealer versus a Broker-Dealer for transactions in municipal securities. In addition, the MSRB believes investors should benefit from receiving the same type of information from Bank Dealers and Broker-Dealers in relation to an investment recommendation. Therefore, as stated above, because of the creation of consistent regulatory requirements across Bank Dealers and Broker-Dealers for their retail municipal recommendations and the greater competition fostered by this consistency among firms serving retail customers, the MSRB believes that the proposed Best Interest Amendments would facilitate capital formation.

Institutional SMMP Amendment

The MSRB proposal to amend MSRB Rule G-48 would reinstate a previously existing actual control or de facto control standard for Institutional SMMP accounts for purposes of dealers' quantitative suitability obligations.

Benefits

The proposed Institutional SMMP Amendment to MSRB Rule G-48 would reduce the compliance burden for all dealers, including Bank Dealers and Broker-Dealers, by eliminating the requirements to undertake a quantitative suitability analysis for Institutional SMMPs when a dealer does not have actual control or de facto control over the customer's accounts. The requirement is not necessary because of the sophistication and differing needs of Institutional SMMPs who have knowingly declined to have such requirements apply to them, as described herein.

Costs

The MSRB believes the proposed Institutional SMMP Amendment to MSRB Rule G-48 to modify the quantitative suitability obligation of a dealer in the limited

circumstances provided under the proposed Institutional SMMP Amendment would have minimal costs associated, particularly since the intent was to reinstate an exemption from quantitative suitability previously enacted for all recommendations through MSRB Rule G-19. One potential one-time cost would be for all dealers, including Bank Dealers and Broker-Dealers, to update their policies and procedures. Because of the recent existence of the same actual control or de facto control standard that would be reestablished by the proposed Institutional SMMP Amendment, the MSRB believes this one-time change should be familiar to firms and the cost of compliance implementation will be reduced in this regard. Moreover, to the degree that dealers are likely to reintroduce the same standards in their policies and procedures as previously existed, the cost of implementation would be minimized.

In addition, one impetus of the Broker-Dealer Harmonization Filing was to harmonize the rule with Regulation Best Interest and FINRA Rule 2111 and to reduce inconsistency on suitability requirements between FINRA's rules and MSRB's rules. By amending MSRB Rule G-48 to provide a narrow exemption from the application of quantitative suitability, this rule would not be fully harmonized with FINRA Rule 2111, and, thus, would establish two standards for accounts across the corporate and municipal securities markets. The MSRB believes that this lack of harmonization is justified in this instance for all the reasons stated herein,⁸⁰ including the fact that Institutional SMMPs are by their nature sophisticated entities that have affirmed and self-identified their capacity to independently evaluate dealers' recommendations of municipal securities transactions.

⁸⁰ See related discussion supra under Purpose and Intent of the Institutional SMMP Amendment to MSRB Rule G-48.

Effect on Competition, Efficiency, and Capital Formation

The MSRB believes the proposed Institutional SMMP Amendment to MSRB Rule G-48 would improve the operational efficiency of the municipal securities market by reintroducing the element of actual control or de facto control with respect to Institutional SMMP accounts that would trigger a dealer's quantitative suitability obligation, as dealers would have one fewer compliance burden. The MSRB does not expect that the proposed Institutional SMMP Amendment to MSRB Rule G-48 would harm competition in the municipal securities market, because the proposed Institutional SMMP Amendment would be applicable to all dealers and, therefore, any of the benefits and burdens created by the proposed Institutional SMMP Amendments would be evenly applied to all such firms transacting with Institutional SMMP customers and, thereby, avoid discriminatory impacts among dealer firms.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

On March 4, 2021, the Board published a request for comment seeking public feedback on requiring Bank Dealers to comply with Regulation Best Interest when making a retail municipal recommendation (the "Request for Comments").⁸¹ The Board received five comments letters in response to the Request for Comments.⁸² Each of these

⁸¹ MSRB Notice 2021-06 (March 4, 2021).

⁸² Letter from Justin M. Underwood, Executive Director, American Bankers Association ("Bankers Association"), dated June 2, 2021 (the "Bankers Association Letter"); Letter from Christopher A. Iacovella, Chief Executive Officer, American Securities Association ("Securities Association"), dated May 27, 2021 (the "Securities Association Letter"); the Commerce Bank Letter; Letter from Leslie M. Norwood, Managing Director and Associate General Counsel, Securities Industry and Financial Markets Association ("SIFMA"), dated June 2, 2021 (the "SIFMA Bank Dealer Letter"); and Letter from Leslie M. Norwood,

will be addressed below. The comment letters addressing the proposed Best Interest Amendments will be discussed separately from the one comment letter addressing the proposed Institutional SMMP Amendment.

Discussion of Comments Related to the Best Interest Amendments

The MSRB received four comment letters addressing the proposed Best Interest Amendments in response to its Request for Comments. Comments submitted by SIFMA and the Securities Association were supportive of the proposed Best Interest Amendments, while the comments submitted by the Bankers Association and Commerce Bank expressed concerns about the proposed Best Interest Amendments, generally, in terms of the consequences of the potential compliance burden in relation to Bank Dealers' limited retail customer activity, as further discussed below.

Support for a Uniform Regulatory Standard

SIFMA cited the goal of achieving regulatory parity among regulated entities as the reason for being in favor of the proposed rule change.⁸³ Specifically, the SIFMA Bank Dealer Letter stated that "SIFMA supports the proposed amendment to extend Regulation Best Interest to bank dealers, as defined in the notice" and that "we believe that regulatory parity among regulated entities, which this amendment achieves, is a worthwhile goal."⁸⁴ The Securities Association cited a reduction in regulatory confusion and establishing Regulation Best Interest as the standard for Broker-Dealers and Bank

Managing Director and Associate General Counsel, SIFMA, dated June 2, 2021 (the "SIFMA SMMP Letter").

⁸⁴ SIFMA Bank Dealer Letter at 1-2.

Dealers as the reasons for being in favor of the proposed rule change.⁸⁵ The Securities Association stated that adopting Regulation Best Interest for bank dealers will “reduce regulatory confusion for municipal dealers and further establish [Regulation Best Interest] as the national standard for broker-dealers and bank dealers.”⁸⁶ Further, the Securities Association stated that “[it] appreciates the work by the MSRB in the Proposal to align their rules with the SEC and Financial Industry Regulatory Authority’s (FINRA) when possible so that broker-dealers are not subjected to multiple standards.”⁸⁷ As discussed above, the Board agrees with the commenters that the proposed Best Interest Amendments would benefit the municipal securities market through more uniform regulatory standards.

Concerns Regarding Bank Dealer’s Compliance Burden and Effects on Competition

Among other topics in the Request for Comments, the Board sought public input on the potential burdens associated with the proposed Best Interest Amendments and, in particular, if requiring Bank Dealers to comply with Regulation Best Interest would disincentivize Bank Dealers from engaging in certain municipal securities activities with retail customers.⁸⁸ Commerce Bank and the Bankers Association offered comments. The Bankers Association commented that, while its members have long supported the notion that financial professionals offering investment advice to retail customers should be subject to a best interest standard, the Bankers Association urged the Board to consider

⁸⁵ Securities Association Letter at 1.

⁸⁶ Id. at 1.

⁸⁷ Id. at 2.

⁸⁸ Request for Comments at 7.

the compliance costs imposed by such a rule on Bank Dealers in relation to their limited amount of retail customer activity.⁸⁹ The Bankers Association continued, stating that, ultimately, Bank Dealers in municipal securities do not have a significant retail customer base to warrant a new regulatory compliance regime in this manner.⁹⁰

Echoing this concern regarding the potential compliance burden of the proposed Best Interest Amendments, Commerce Bank responded that they would assess the additional compliance costs that come with compliance with Regulation Best Interest and consider the elimination of providing recommendations for securities or strategies to retail customers.⁹¹ Commerce Bank also expressed concern that the compliance burden of the proposed Best Interest Amendments may cause it to eliminate or become uncompetitive in relation to certain underwriting activities, particularly for services provided to issuers utilizing retail order periods.⁹²

⁸⁹ Bankers Association Letter at 2

⁹⁰ Id.

⁹¹ Commerce Bank Letter at 2.

⁹² Commerce Bank Letter at 3 (“Assuming the amendments are approved as adopted and bank dealers begin to move away from providing services to retail customers, bank dealers that underwrite municipal bonds would need controls in place to ensure underwriting or related commitments are appropriate for any retail order periods required by an issuer. The potential impact may be a smaller number of underwriting firms available or willing to work with smaller issuers and public entities in the market, limiting the number of competitors available for either competitive or negotiated deals.”) In addition to the reasons discussed below, the MSRB observes that analogous concerns regarding such dampening effects of Regulation Best Interest’s requirements on the competition for underwriting activities equally apply to Broker-Dealers. Yet, the Commission ultimately found that Regulation Best Interest would not have a deleterious effect on capital formation. See, generally, Regulation Best Interest Adopting Release, 84 FR at 33461 et seq.

While the Board believes that commenters' concerns regarding the potential compliance burden for Bank Dealers associated with the proposed Best Interest Amendments are valid, the Board also believes that the potential investor protection benefits associated with the proposed Best Interest Amendments outweigh these potential compliance burdens for Bank Dealers. The Bankers Association Letter and the Commerce Bank Letter articulated concerns regarding the potential compliance burden associated with the proposed Best Interest Amendments,⁹³ but these commenters did not specifically address why Bank Dealers face compliance burdens that are materially different from those faced by Broker-Dealers, who are already required to adhere to the enhanced suitability standards required by Regulation Best Interest. Consequently, the MSRB is unaware of any material distinctions between the municipal securities activities of Bank Dealers and Broker-Dealers that would persuade the MSRB to propose a non-uniform regulatory scheme of lesser investor protections for the retail municipal recommendations of Bank Dealers.

Moreover, in developing the proposed Best Interest Amendments, the MSRB observed that Regulation Best Interest did not adopt de minimis thresholds or other standards to exclude smaller regulated entities with lesser amounts of retail customer activity from Regulation Best Interest's baseline compliance burdens.⁹⁴ Relatedly, the Commission concluded that the final version of its Regulation Best Interest appropriately

⁹³ See, respectively, Bankers Association Letter at 2 and Commerce Bank Letter at 2 (noting that retail accounts account for approximately 9% of their total open accounts and only a portion of these accounts transacted in the previous twelve months).

⁹⁴ See, generally, Regulation Best Interest Adopting Release, 84 FR at 33485 et seq (discussing impact on "Small Entities Subject to the Rule").

balanced the concerns of various commenters from larger and smaller entities.⁹⁵ Similar to the Commission's determination, the MSRB believes that the proposed Best Interest Amendments are written to balance the interests of commenters, including the various types and sizes of dealer entities, to best achieve the important goals of enhancing retail investor protection and decision making, while preserving, to the extent possible, retail investor access (in terms of choice and cost) to differing types of municipal security investment services and municipal security products.

Relatedly, the MSRB observes that the Commission determined that Regulation Best Interest would not have a deleterious effect on capital formation.⁹⁶ More specifically, the Commission concluded that (i) the possibility that Regulation Best Interest may increase the efficiency of the recommendations provided by the associated persons of the broker-dealer may enhance the attractiveness of broker-dealer services for those investors who currently do not invest through broker-dealers,⁹⁷ and (ii) if retail customers are more willing to participate in the securities markets through broker-dealers, Regulation Best Interest would have a positive effect on capital formation.⁹⁸

⁹⁵ Regulation Best Interest Adopting Release, 84 FR at 33323 ("After careful consideration of the comments and additional information we have received, we believe that Regulation Best Interest, as modified, appropriately balances the concerns of the various commenters in a way that will best achieve the Commission's important goals of enhancing retail investor protection and decision making, while preserving, to the extent possible, retail investor access (in terms of choice and cost) to differing types of investment services and products.")

⁹⁶ See, generally, Regulation Best Interest Adopting Release, 84 FR at 33461 et seq.

⁹⁷ Regulation Best Interest Adopting Release, 84 FR at 33462.

⁹⁸ Id.

For similar reasons, the MSRB believes that the proposed Best Interest Amendments would not hinder capital formation in the municipal securities market, as suggested by the Commerce Bank Letter, such as in instances where there is less underwriter competition for small municipal issuers or municipal issuers who seek to utilize retail order periods. To the degree that retail municipal recommendations are subject to a uniform regulatory standard across Bank Dealers and Broker-Dealers, the MSRB believes that the proposed Best Interest Amendments may increase the efficiency of retail municipal recommendations and enhance the attractiveness of dealer's municipal security services. This uniform regulatory standard could draw more retail customers to the primary offering of municipal securities with retail order periods and, in this respect, incrementally reduce issuer borrowing costs.

Discussion of Comments Related to the Institutional SMMP Amendment

The Board did not seek separate comment on the proposed Institutional SMMP Amendment but did receive the SIFMA SMMP Letter as part of the Request for Comments, which was generally supportive of the proposed Institutional SMMP Amendment. SIFMA stated in the SMMP Letter that its members “feel strongly that the Quantitative Suitability Requirement in Rule G-19 should be clarified, and interpreted as applicable only to natural person SMMPs, but not to institutional SMMPs. Extending the Quantitative Suitability Requirement to all SMMPs would be unduly costly and burdensome.”⁹⁹ As discussed above, the Board agrees with the commenter that requiring a dealer to undertake a quantitative suitability analysis, when an institutional customer

⁹⁹ SIFMA SMMP Letter at 2.

has already affirmatively opted out of receiving such an analysis, is an unnecessarily burdensome requirement to place on dealer's recommendations to Institutional SMMPs.

SIFMA cited the MSRB's "history of treating SMMPs differently from non-SMMPs, based on a reasoned recognition of the differences between these two investor classes and the relative protections that should be afforded to both."¹⁰⁰ The Board agrees that in limited circumstances it is appropriate for certain investor classes to be afforded different protections under MSRB rules, as different classes can have differing levels of sophistication, differing risk tolerances, and differing investment goals. As noted above, the SMMP concept and the modified regulatory obligations afforded to SMMPs under MSRB rules are intended to account for the distinct capabilities of certain self-identifying, sophisticated, non-retail customers, as well as the varied types of dealer-customer relationships occurring in the municipal securities markets. Thus, the MSRB believes it is appropriate to afford Institutional SMMPs more finely tailored protections, and that the proposed Institutional SMMP Amendment would not erode the overall protections afforded to Institutional SMMPs.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the Federal Register or within such longer period of up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

¹⁰⁰ SIFMA SMMP Letter at 3.

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>);
or
- Send an email to rule-comments@sec.gov. Please include File Number SR-MSRB-2022-02 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549.

All submissions should refer to File Number SR-MSRB-2022-02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld

from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549 on official business days between the hours of 10:00 am and 3:00 pm. Copies of the filing also will be available for inspection and copying at the principal office of the MSRB. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-MSRB-2022-02 and should be submitted on or before **[INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]**.

For the Commission, pursuant to delegated authority.¹⁰¹

J. Matthew DeLesDernier,

Assistant Secretary.
